Re: DOJ Case No. 90-11-2-696/1

Subject: January 2011 Monthly Report
Sangamo Weston/Twelvemile Creek/Lake Hartwell Superfund Site
Natural Resources Trustees Consent Decree

Dear Section Chief:

In accordance with the Consent Decree and Section XIV of the Unilateral Administrative Order for the above referenced site, Schlumberger is required to submit Progress Reports on a quarterly basis. Given the current pace of activities, we will be submitting Progress Reports on a monthly basis until further notice in satisfaction of the reporting requirements of the Consent Decree and Unilateral Administrative Order.

In keeping with Paragraph 20 of the Consent Decree:

> I certify that the information contained in or accompanying this submission is true, accurate and complete. This certification is based on my personal preparation, review, or analysis of the submission, and/or supervision of persons who, acting on my instructions, made the verification that the submitted information is true, accurate and complete.

If you have any questions, please do not hesitate to contact me at (281) 285-3692.

Sincerely,

D. J. Ferguson

January 2011 Monthly Report
Sangamo Weston/Twelvemile Creek/Lake Hartwell Superfund Site
Operable Unit 2

Activities Initiated/Completed

- Completed construction of siphons at WSI and operated the system to lower the water level behind the WSI dam in preparation for dam demolition
- Dredge Clare has progressed to STA 15+00, and continues to move back and forth along the creek to reach deeper sediment, to the extent practicable, accessible by the creek level being lowered.
- Dredge Kami is located at approximately Station 49+90 (Woodside II Impoundment).
- On January 18, 2011, SCDHEC Solid Waste Management Regional personnel were onsite for a general visit/inspection and performed a Class Three Landfill Inspection in accordance with Regulation 61-107.19, Part V. The inspection indicated that the facility was operating properly, and no problems were observed. The completed Inspection Form is provided as Attachment 1.
- Received a response dated January 19, 2011 from the Trustee Council on their proposed modification to the dredge verification protocols.
- Received an approval response from the Trustee Council dated January 25, 2011 to the Dredge Verification Report STA 5+00 to STA 10+00.

Results of Sampling, Tests, and Other Data

- Sampling and analysis is being conducted relative to the creek turbidity, and water treatment system (WTS) effluent water. Results for the effluent water are attached (Attachment 2) and the continuous turbidity monitoring data is available upon written request.
- Project photographs are included as Attachment 3.

Plans, Reports, and other Deliverables

- Analytical data related to samples collected from the WTS to assess water treatment effluent water were submitted to SCDHEC in the December Monthly Report (submitted January 28, 2011) in Attachment 2.

Work Planned for February 2011

- Continue dredge verification surveys with submittal of each 500 foot section to the Special Receivers and their consultant. Expecting STA 10+00 to STA 13+50 and STA 45+00 to 50+00.
- Continue placement of dredged sediment in SMU.

- Continue monitoring WTS discharge.
- Complete dredging in the WSI impoundment.
- Continue dredging in the WSII impoundment.
- Initiate demolition of WSI dam.

Issues Encountered, Anticipated Delays, Solutions

- Extreme weather conditions (e.g., subfreezing temperatures, large snow fall) during the week of January 10th continued to impact site operations, including temporary postponement of operations and frozen and/or broken components, despite Contractor's winterization efforts.
- Continuing to handle significant amount of debris and vegetation which presented material handling challenges and some delays to dredging near the Woodside I dam.
- The sluice gate used to release sediments from the Easley Central Dam remains partially open due to mechanical issues and debris blocking closure.

Class Three Landfill Inspection Form
Regulation 61-107.19, Part V

Facility Name: Bull Creek SWM Date/Time of Inspection 18 JAN 2016

County: Pickens Permit #: —

Reason for Inspection: X Routine; ____ Follow-up; ____ Complaint; ____ Other ____

Current Weather Conditions: Cloudy Skies 40°

Previous 24-hours: Rain (Y)N – If yes, amount < 1" inches; High winds Y(N)

1 – Meets or exceeds regulatory requirements; 2A – Improvement needed (minor issues exist; corrective measures recommended); 2B – Improvement needed (moderate issues exist; corrective action required and scheduled); 3 – Unacceptable (serious issues and/or recurring issues with minimal or no corrective action taken – alleged regulatory or permit condition violations have occurred – enforcement referral required); Y – Yes: Meets or exceeds regulatory requirements; N – No: Corrective measures recommended that should be fixed by the next inspection or an agreed upon completion date; NA – Not applicable; NI – Not Inspected

Procedures for Excluding Receipt of Unapproved Waste (258.20)
1. NA Overall effectiveness of Special Waste Analysis and Implementation Plan (SWAIP)
2. Y N NA NI Trained waste screener present
3. Y N NA NI Random daily load inspections conducted and documented
4. Y N NA NI Records of unacceptable waste maintained
5. Y N NA NI Personnel training program on recognition of regulated hazardous waste and PCB waste
6. Y N NA NI Record of Notification to Department within 72-hours of hazardous or PCB waste receipt
7. Y N NA NI Unauthorized wastes removed from working face by the end of the operating day

Cover Material Requirements (258.21)
8. ____ ≥ 6" soil (short-term cover)
9. N/A Alternate Daily Cover (ADC)
10. N/A ≥ 6" soil (long-term and/or intermediate cover)
11. Y N NA NI Adequate soil quantity available for cover

Control of (258.21, 22, 24, 25 and 37):
12. 1 Blowing litter
13. 1 Off-site odors
14. 1 Disease vectors
15. 1 Fires/Open burning
16. 1 Scavenging

Access Requirements (258.25)
17. 1 Condition of access controls
18. 1 Condition of all weather roads – entrance
19. 1 Condition of all weather – internal haul roads

Run-on/Run-off Controls (258.26)
20. 1 Condition of ditches/swales
21. 1 Condition of berms/terraces/downchutes
22. 1 Condition of sedimentation ponds

Leachate Seeps (258.26 and 27)
23. N/A Leachate seep management

Liquid Restrictions (258.28)
24. ____ Free of unauthorized bulk or non-containerized liquids

Record Keeping Requirements (258.29)
25. Y N NA NI Required records are maintained in the landfill's operating record

Scale Requirements (258.30)
26. Y N NA NI Scales installed and functioning properly

Required Equipment to Operate Landfill (258.31)
27. Y N NA NI Required equipment operational – if not please provide details in comments as to the type of equipment down for repairs, impact to operations, and status on temporary replacement equipment
- Dredges ✓
- Pumps ✓
- Screeners ✓
- Earth movers ✓

Certified Landfill Manager/Supervisor (258.32)
28. Y N NA NI Manager and supervisor certified by SCDHEC
29. Y N NA NI Certified manager or supervisor on-site

Leachate Collection System (258.33 and 34)
30. Y N NA NI Leachate handling agreement in place
31. ____ Leachate collection system management

Leachate Recirculation System (258 Subpart I and Permit)
32. ____ Leachate recirculation system management
33. Y N NA NI Required leachate recirculation reports/data contained in the landfill's operating record
34. N/A Leachate seep management
35. ____ Leachate collection system management

Testing of Municipal Solid Waste (MSW) Incinerator Ash (258.35)
36. Y N NA NI MSW incinerator ash management

Sign Requirements (258.36)
37. Y N NA NI Required signs posted

Conditions of Monitoring Wells (258.51)
38. 1 Monitoring well maintenance program

Working Face/Elevation (258.87)
39. Y N NA NI Method of elevation control with benchmark

Plans and Permit (Permit)
40. Y N NA NI Operating in accordance with approved plans and general permit
41. Y N NA NI Permitted engineering drawings available
42. Y N NA NI Permitted operational plan available
43. Y N NA NI Permitted stabilization/landscaping plan available
44. Y N NA NI Permitted contingency plan available
45. Y N NA NI Permitted approved groundwater-monitoring plan available
46. Y N NA NI Permitted closure plan available
47. Y N NA NI Permitted post-closure plan available

Name of those present during the Inspection: ____

Comments: NO PROBLEMS NOTED DURING INSPECTION

Inspection Item	Corrective action required	Date to be completed

Email:
lance.ketcham@
arcadis-us.com

Our ref:
MT001019

Dear Mr. Stoudemire:

On behalf of Schlumberger Technology Corporation (STC), ARCADIS is providing a summary of sampling results for the Twelvemile Creek Restoration Project in Pickens County for the month of December 2010 in accordance with the October 15, 2009 letter from Butch Swygert of South Carolina Department of Health and Environmental Control (SCDHEC) to Chris Moody of ARCADIS and the August 9, 2010 SCDHEC construction operation approval memorandum, which replaces the March 11, 2010 SCDHEC construction operation approval memorandum. The August 9, 2010 approval memorandum upgrades the onsite water treatment plant to a Group III – Physical/Chemical facility with a maximum discharge of 8.64 million gallons per day (MGD).

Table 1 contains the daily discharge information from the water treatment plant to Twelvemile Creek. This data is recorded onsite and is reviewed by a South Carolina certified water treatment plant operator. The maximum daily discharge for December 2010 was 3.33 MGD on December 29. The average discharge from the water treatment plant for the month of December was 1.51 MGD.

Table 2 contains the results of the analyses described in Table 1 of the October 15, 2009 letter that were performed on the water treatment plant effluent during the month of December 2010. The Laboratory Services Reports from Rogers & Callcott Laboratory Services related to these tests are provided in Attachment A. The samples were analyzed for pH, temperature, total suspended solids and PCBs. The results of these tests were within the ranges outlined in the October 15, 2009 letter.

Table 3 summarizes the results of the whole effluent toxicity (WET) testing; the Laboratory Services Reports for these tests are provided in Attachment B. Samples for toxicity testing were collected on December 7, 8 and 10, 2010. The acute toxicity testing passed for the month of December. Chronic testing for the dates mentioned indicated minimal effects on survival, however the results for reproduction were not within the ranges outlined in October 14, 2009 letter. Subsequent chronic testing was conducted on December 17, 20 and 22, 2010 and results were provided on January 3, 2011. The results from the subsequent testing again indicated minimal effect on survival and less impact on reproduction than the earlier test; however, the results were still just above the ranges outlined in the October 15, 2009 letter. The processes of the water treatment plant were modified to address the chronic WET testing results and subsequent re-sampling in the month of January shows results within the ranges outlined in the October 15, 2009 letter (results to be provided in next month's report).

If you have any questions on the above, please feel free to contact me.

Sincerely,

ARCADIS

Lance S. Ketcham
Principal Engineer

12/22/2010	2.23
12/23/2010	2.73
12/24/2010	0.00
12/25/2010	0.00
12/26/2010	0.00
12/27/2010	1.33
12/28/2010	2.93
12/29/2010	**3.33**
12/30/2010	2.39
12/31/2010	1.85
Total	46.82
Days per Month	31
Average	1.51

Notes:

1. Data is from onsite records detailing the daily discharge volumes to Twelvemile Creek; a discharge of 0 MGD is recorded when the treatment plant is not operating or discharging to Twelvemile Creek. Discharge data was recorded by the South Carolina certified wastewater treatement plant operator from Rogers & Callcott.
2. The bolded value is the maximum daily discharge recorded.

Superscript Notes:

[1] Discharge reporting guidelines are outlined in the 10/15/2009 letter from Butch Swygert (South Carolina Department of Health and Environmental Control) to Chris Moody (ARCADIS).

Acronyms and Abbreviations:

Avg - average
Max - maximum
MGD - million gallons per day
MR - monitor and report

Notes:

1. Sampling results compiled from Laboratory Services Reports provided by Rogers & Callcot Laboratory Services and submitted in tabular form as required per the10/15/2009 letter from Butch Swygert (South Carolina Department of Health and Environmental Control [SCDHEC]) to Chris Moody (ARCADIS) and the 3/11/2010 SCDHEC construction and operational approval memorandum.
2. The monthly average includes non-detect readings (indicated by "<") and assumes a value equal to the detection limit. Monthly averages are not calculated for parameters without a detected concentration (indicated by "-").

Superscript Note:

[1] Discharge reporting guidelines and limits are outlined in the 10/15/2009 letter from Butch Swygert (SDHEC) to Chris Moody (ARCADIS)

Acronyms and Abbreviations:

°C - degrees centigrade
G - grab sample
C - 24-hour composite sample
µg/L - micrograms per liter
MGD - million gallons per day
mg/L - milligrams per liter
NA - not analyzed
PCB - polychlorinated biphenyl
Temp. - temperature

Table 3. Whole Effluent Toxicity Result for December 2010. Twelvemile Creek Restoration Project, Pickens County

WET Analysis	Monthly Avg.[1]	Daily Max.[1]	Event 1 Results	Event 2 Results
Ceriodaphnia dubia Chronic WET @ CTC=17.4%	25%	40%	75.1%	42.2%
Ceriodaphnia dubia Chronic WET-Reproduction @ CTC=17.4%	MR, %	MR, %	75.1%	42.2%
Ceriodaphnia dubia Chronic WET-Survival @ CTC=17.4%	MR, %	MR, %	0.0%	0.0%
Ceriodaphnia dubia Acute WET @ ATC=35.5%	–	0[2]	0	NA

Notes:

1. WET testing was performed by ETT.
2. Results of the WET testing are presented as the percent reduction relative to the control sample.
3. Samples for Event 1 were collected on 12/7, 12/8, and 12/10/2010. One composite sample was collected each day (sample numbers AC91981, AC92064, and AC92283, respectively) to complete the Chronic WET testing. Sample AC91881 was used in the Acute WET testing.
4. Samples for Event 2 were collected on 12/17, 12/20, and 12/22/2010. One composite sample was collected each day (sample numbers AC92779, AC92795, and AC92959, respectively) to complete the Chronic WET testing. Sample AC90996 was used in the Acute WET testing.
5. Shaded values indicate that the results are not within the ranges outlined in the 10/15/2009 letter.

Superscript Notes:

[1] Discharge reporting guidelines and limits are outlined in the 10/15/2009 letter from Butch Swygert (South Carolina Department of Health and Environmental Control) to Chris Moody (ARCADIS).

[2] A results of "0" indicates a passing result.

Laboratory Services Report

Client: Schlumberger Technology Corporation
Sangamo - Twelve Mile Creek Project
Attention Gary Odom by email

Date Received: 12/14/2010
Time Received: 17:15
Date Reported: 12/16/2010

South Carolina Laboratory Identification 23105
North Carolina Laboratory Certificate Number 27
NELAP Laboratory Identification E87822

Sample Number	*Sample Description*
AC92491	Schlumberger Technology TMC Water Treatment Plant Effluent Discharge grab, collected on 12/14/2010 at 16:00
AC92492	Schlumberger Technology TMC Water Treatment Plant Effluent Discharge composite, collected on 12/14/2010 at 15:55

The attached report is for the samples that were received and are referenced above. Rogers and Callcott maintains a formal QA/QC program. Unless otherwise noted, all analyses performed under NELAP certification have complied with all the requirements of the NELAC standard. The analyses met the QA/QC confidence interval for each test method unless otherwise qualified. Estimated uncertainty available upon request.

We appreciate the opportunity to be of service to you. Please contact us at (864) 232-1556 should you have any questions about this report.

Case Narrative

AC91981 Schlumberger Technology TMC Water Treatment Plant Effluent Discharge composite, collected on 12/07/2010 at 09:15

Composite sample AC 91981 was subcontracted to ETT for Acute and Chronic Toxicity tests.

AC92064 Schlumberger Technology TMC Water Treatment Plant Effluent Discharge composite, collected on 12/08/2010 at 09:30

This sample was an additional composite subcontracted to complete the Chronic Toxicity testing.

AC92283 Schlumberger Technology TMC Water Treatment Plant Effluent Discharge composite, collected on 12/10/2010 at 09:25

This sample was an additional composite subcontracted to complete the Chronic Toxicity testing.

Laboratory Services Report

Client: Schlumberger Technology Corporation
Sangamo - Twelve Mile Creek Project
Attention Gary Odom by email

Date Reported: 01/03/2011

South Carolina Laboratory Identification 23105
North Carolina Laboratory Certificate Number 27
NELAP Laboratory Identification E87822

Sample Number	*Sample Description*
AC92779	Schlumberger Technology TMC Water Treatment Plant Effluent Discharge grab, collected on 12/17/2010 at 10:10
AC92795	Schlumberger Technology TMC Water Treatment Plant Effluent Discharge grab, collected on 12/20/2010 at 09:45
AC92959	Schlumberger Technology TMC Water Treatment Plant Effluent Discharge composite, collected on 12/22/2010 at 09:30

The attached report is for the samples that were received and are referenced above. Rogers and Callcott maintains a formal QA/QC program. Unless otherwise noted, all analyses performed under NELAP certification have complied with all the requirements of the NELAC standard. The analyses met the QA/QC confidence interval for each test method unless otherwise qualified. Estimated uncertainty available upon request.

We appreciate the opportunity to be of service to you. Please contact us at (864) 232-1556 should you have any questions about this report.

Case Narrative

AC92779 Schlumberger Technology TMC Water Treatment Plant Effluent Discharge grab, collected on 12/17/2010 at 10:10

Grab sample AC 92779 was subcontracted to ETT for Chronic Toxicity testing.

AC92795 Schlumberger Technology TMC Water Treatment Plant Effluent Discharge grab, collected on 12/20/2010 at 09:45

This sample was an additional grab subcontracted to complete the Chronic Toxicity testing.

AC92959 Schlumberger Technology TMC Water Treatment Plant Effluent Discharge composite, collected on 12/22/2010 at 09:30

This sample was an additional composite subcontracted to complete the Chronic Toxicity testing.

Ceriodaphnia dubia Survival and Reproduction Test

EPA-821-R-02-013 Method 1002

Test Species: *Ceriodaphnia dubia*

Client: SCHLUMBERGER
Facility: EFFLUENT
NPDES #: SC

Test Date: 17-Dec-10

Laboratory ID#: T36655

Test Reviewed and Approved By:

Robert W. Kelley, Ph.D.
Laboratory Manager

[redacted] **Certification #E87819**

Test results presented in this report conform to all requirements of NELAC, conducted under NELAC Certification Number E87819 Florida Dept. of Health. Included results pertain only to provided samples.

SCDHEC Certification #23104

NCDENR Certification # 022

COMPOSITE SAMPLING PROCEDURES
Composite samples must be collected over a 24 hour period.
Time Proportional: 1 sample each hour for 24 hours. Equal volumes.
or at minimum 1 sample every 4 hours over 24 hours.
Flow Proportional: As per instructions in NPDES permit.

TEMPERATURE MONITORING PROCEDURES
Sample temperature during collection and transport must be between 0.0 and 6.0 °C. Samples must not be frozen. Use water ice in sealed bags.
Measure temperature upon receipt and record.
Notify client to resample if temperature is out of range.

HOLD TIME PROCEDURES
For toxicity testing the sample must first be used within 36 hours of sample collection (completion of composite sample).
Sample may not be used after 72 hours from sample collection.
